

HyImpulse is a New-Space start-up based in Southern Germany. We are developing a Small-Launcher using disruptive technologies to provide a competitive low-cost small-sat launch service for Europe and worldwide. HyImpulse has been founded by DLR employees with excellent experience and know-how in chemical propulsion, hybrid rocket propulsion and sounding rockets. Being a part of our HyImpulse team means working in an open atmosphere, a dynamic and a professional environment as well as in a good network in the international space industry.

We are expanding now, and we are searching for our site at Neuenstadt am Kocher (Germany) as of now an

Composite Technician

Your tasks

- | Fabrication of composite components for our vehicles
- | Hand lay-up manufacturing using wet lay-up and pre-preg layup processes
- | Operation of our winding machine
- | Work with our workshop team to produce our components and integrate our vehicles

Requirements

- | 3+ years of experience in composite structure fabrication
- | Education/training fiber composite technician or comparable
- | German and/or English

Desired Requirements

- | Ability to solve problems and adapt quickly to changing priorities
- | Ability to work independently, responsibly, and reliably
