

HyImpulse is a New-Space start-up based in Southern Germany. We are developing a Small-Launcher using disruptive technologies to provide a competitive low-cost small-sat launch service for Europe and worldwide. HyImpulse has been founded by DLR employees with excellent experience and know-how in chemical propulsion, hybrid rocket propulsion and sounding rockets. Being a part of our HyImpulse team means working in an open atmosphere, a dynamic and a professional environment as well as in a good network in the international space industry.

We are expanding now, and we are searching for our site at Neuenstadt am Kocher (Germany) as of now an
